Demonstration

Conclusion

- Summer months will have the most amount of violations
- Clear weather tends to produce the most amount of violations
 - Rainy weather will also produce a lot of violations
- Expensive to ignore weather considerations
 - Either red light tickets or getting into an accident

How to Avoid a Red Light Camera Violation

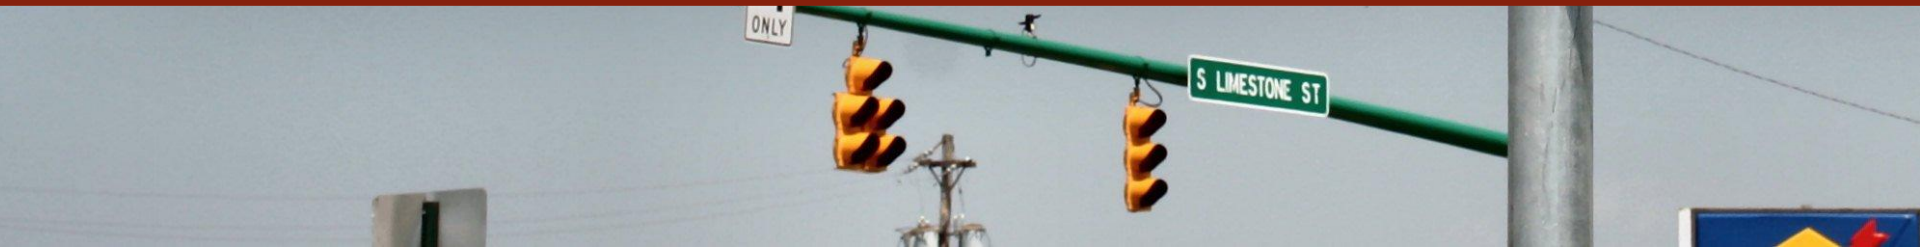

- Do not drive when it is raining
 - Our data has shown that violations happen in the rain more than any type of weather condition.
 - Try to utilize public transportation as much as possible.
- Make sure that you have tires that work well when the ground is wet
- Avoid driving during the summer
- Drive when there is good visibility

Other Ways This Data Can Be Used

- Help drivers determine what weather is most likely to cause violations
- Insurance companies determine what kinds of drivers are most likely to be at risk
- Change stop lights in accordance with weather to help (or fine) drivers
